We have received the K-Electric (KE) bill for the month of March, 2020 which includes recovery of Industrial Support Package Adjustment (ISPA) charges from July, 2019 to December, 2019. Collection of retrospective charges is illegal and unethical and against the law.

In this testing time and challenging situation caused by COVID-19, the city is almost on the verge of lockdown, the economic and production activity is almost at halt and an economic war-like situation is ahead. In this crunch moment, we cannot afford any mistake or miscalculation of any public sector institute.

These charges are past and closed transaction and we have already sold / exported our products without taking this amount into account.

You are requested to kindly instruct KE to withdraw the ISPA charges from Jul-2019 to Dec-2019 from current bills and issue revised bill of current charges only without ISPA so we can pay the bills within due date.
