Circular # 09 / 2020-21

To: All Members of SITE Association (through email & Whatsapp)

FIRE PREVENTION GUIDELINES DURING DRY SEASON

In view of limited resources and unavailability of modern equipment at the SITE Fire Station to handle emergency situations and fire incidents, **it is strongly advised to adopt, amongst others, the following Fire Prevention Tips in factories, especially during the current dry season.**

1. Factories must install at least first aid fighting system.
2. Factory waste (cotton, leftover, garbage, trash, rubbish) must be properly disposed-off on regular basis;
3. Keep your factory's premises clean because clutter contributes to fires;
4. Check electrical hazards as many fires start in faulty wiring;
5. Use and store chemicals safely to prevent flammability and other fire hazards; Provide adequate ventilation when using and storing these substances;
6. Prevent arson fires and don't leave combustible rubbish outside the building where it can be set afire;
7. Smoke only in designated areas, and extinguish smoking materials safely. Never smoke in store rooms or chemical storage areas;
8. Learn how to properly use fire extinguisher.
9. Keep your fire alarm system/smoke detectors and fire equipment in good working condition.

In any Fire Emergency, please call SITE Crime Monitoring Cell at the following numbers (24/7).
